Dear supporters,

Thank you for our most impactful year yet.

In 2023, we finally reached communities in Africa and Asia that truly need our support the most.

Growing up in a post-Soviet country, we've seen what the Internet can do for developing economies. We've witnessed the rise in productivity, income, employability, civic responsibility, and levels of education.

But this year, when we visited our partner organizations in Kenya, we witnessed a thirst for knowledge, opportunities, and connection like we have never seen before. We met outstanding youth who are determined to take advantage of everything the Internet has to offer, work hard, learn, and escape poverty.

This year, thanks to you, we brought 495 students online and started working in countries like Kenya, Uganda, Nigeria, India, and Bangladesh. Thanks to our local partners, our students will have access to outstanding courses, support, and opportunities.

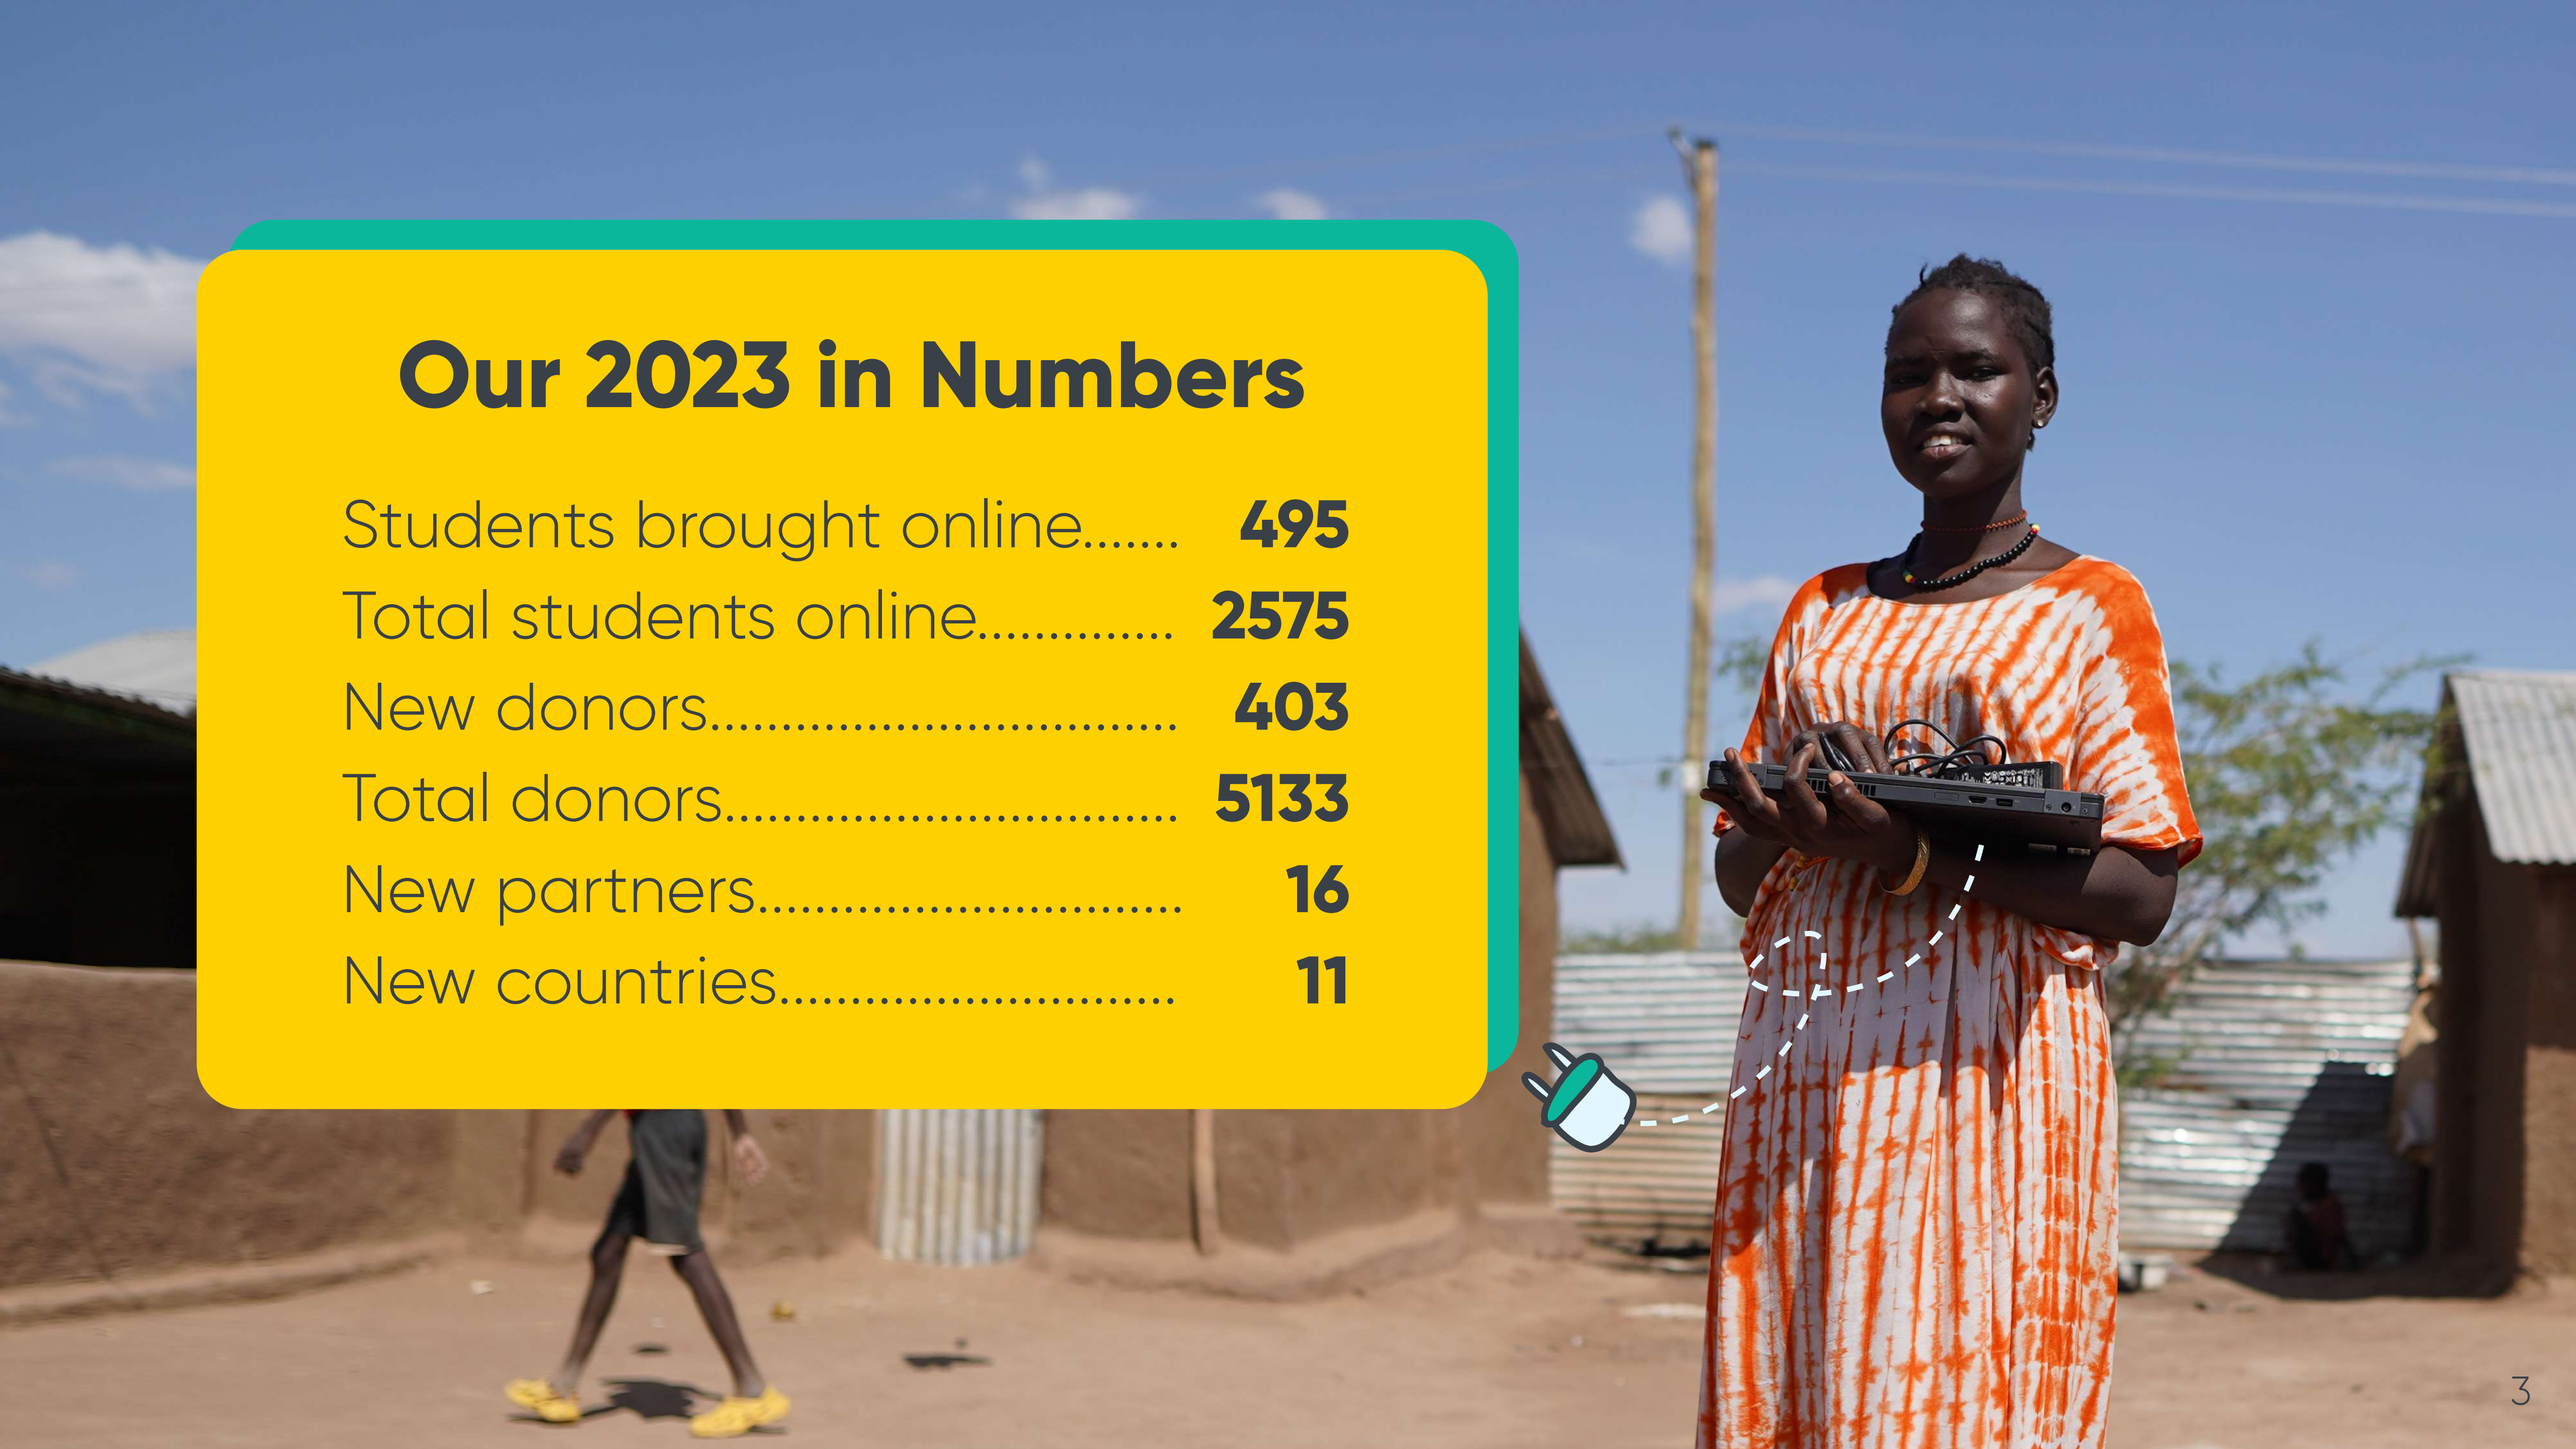
We're grateful that we get to do this, and we're thrilled to have you by our side.

See you next year,

Team GiveInternet.org.

Our 2023 in Numbers

Students brought online.....	**495**
Total students online.....	**2575**
New donors.....	**403**
Total donors.....	**5133**
New partners.....	**16**
New countries.....	**11**



The problem

Over 1 billion students worldwide don't have Internet access. 67% are girls. They've missed out on education, online jobs, conversations, and equal opportunities. And we have missed out on their potential.

The Solution

At GiveInternet.org, you can sponsor Internet fees and laptops for students from some of the most underserved communities and refugee camps in Asia and Africa. Our local educational partners provide skills development programs like coding, design, and healthcare, enabling the students to make a living.

How We Work

Donors choose the country they want to donate to.

Donors sign up for monthly or one-time donations.

Donors decide if they also want to sponsor admin costs.

Our local partners distribute laptops and pay Internet fees.

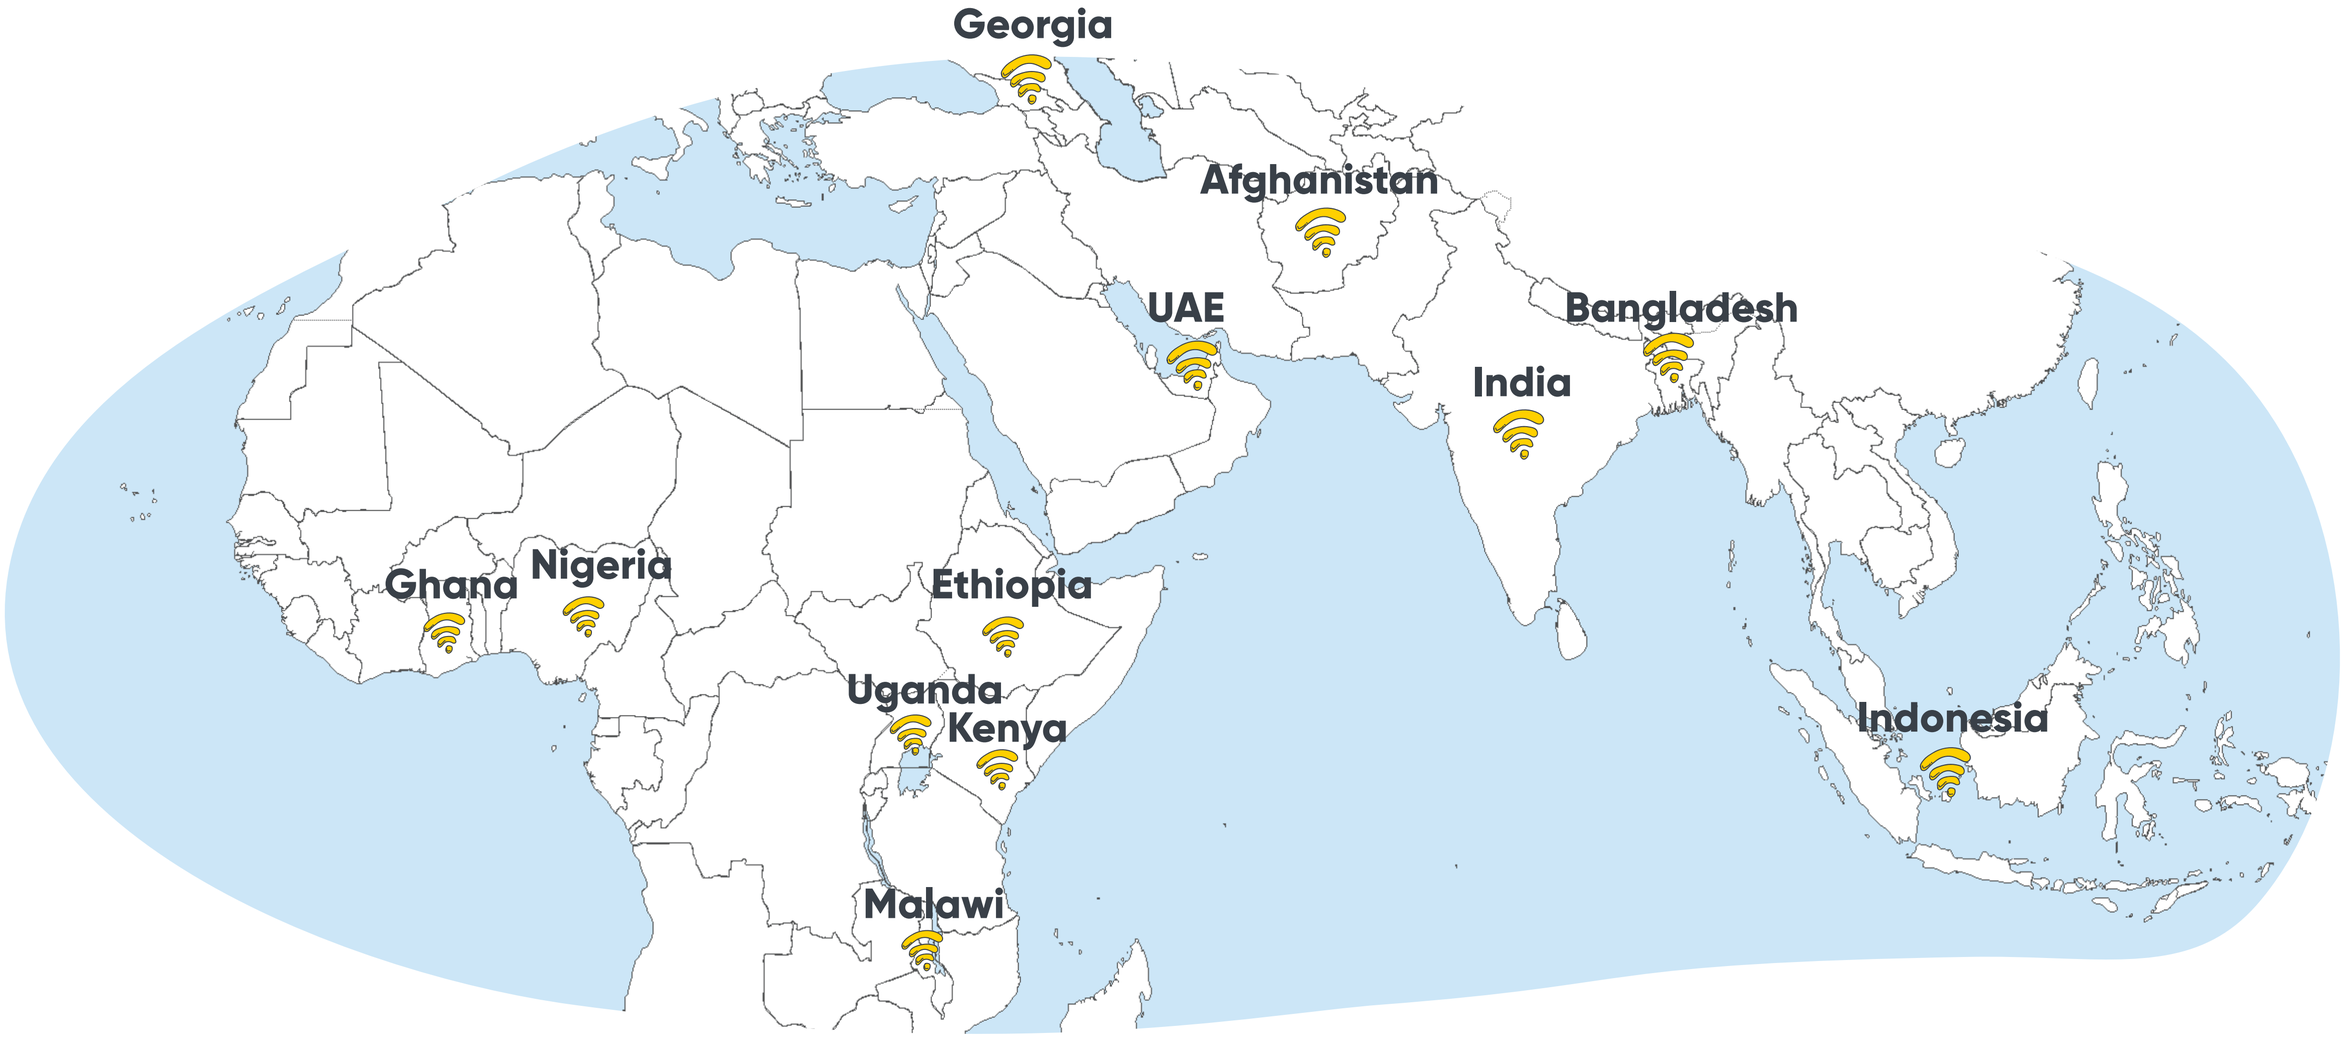
Our local partners train students in coding, healthcare, design, etc.

Donors receive monthly transparency reports with costs and success stories.

We publish footage and stories from the field and advocate for connectivity.

We measure our impact with longitudinal qualitative studies.

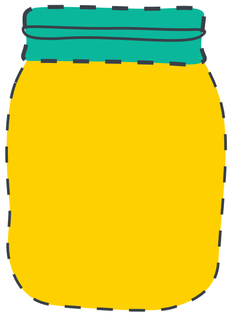
Where We Operate



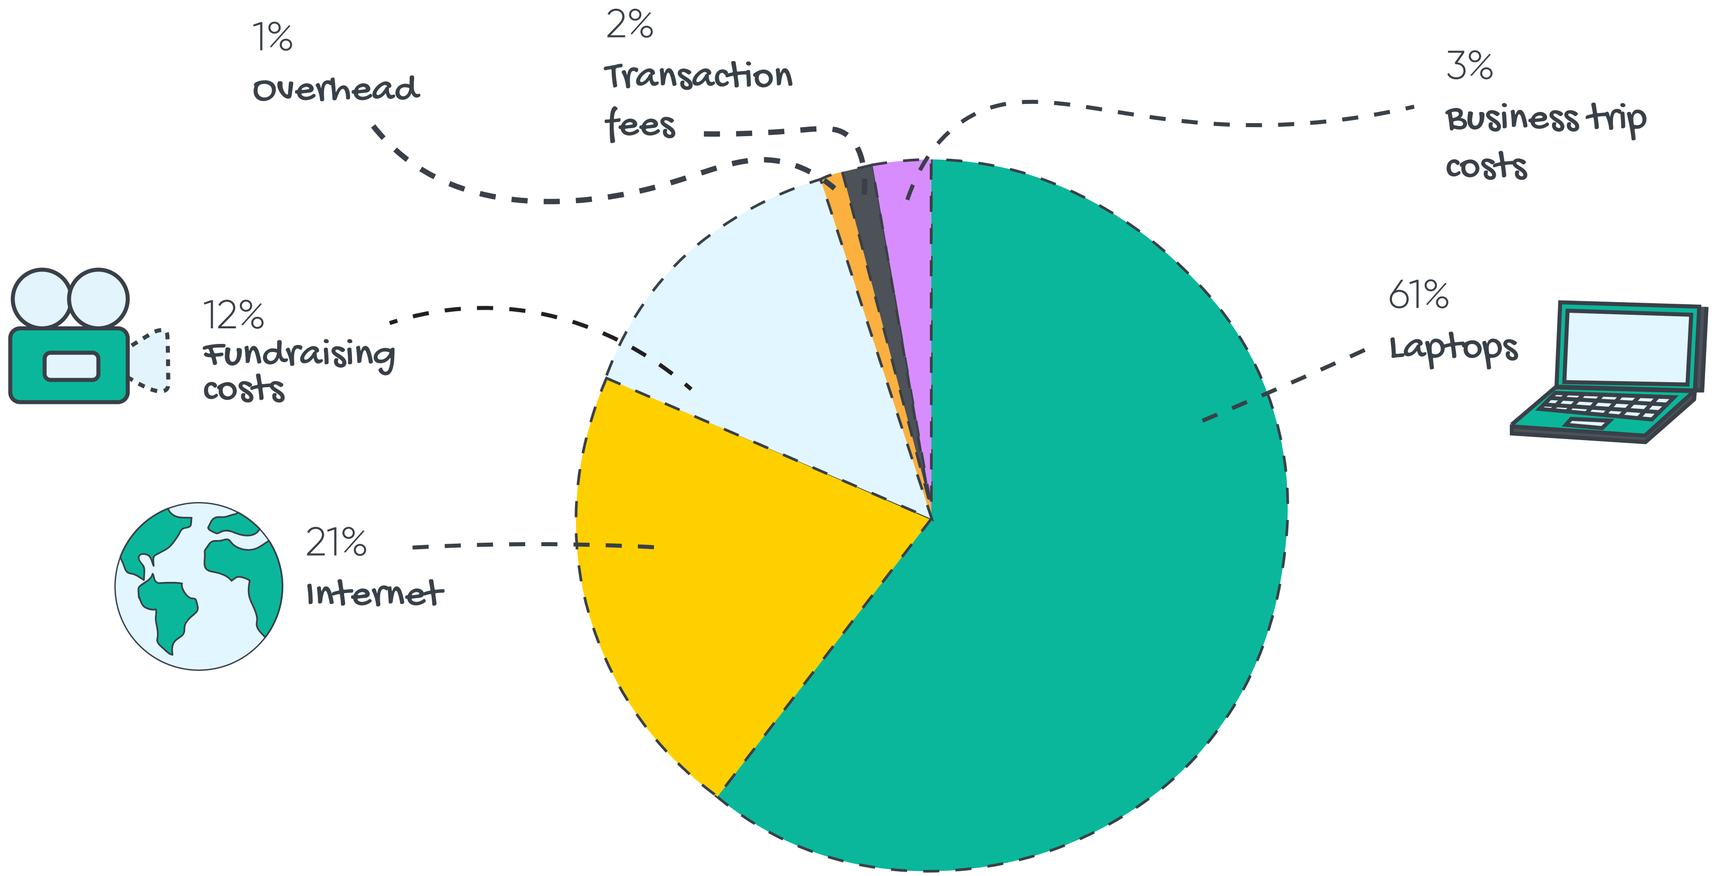
Our Local EdTech Partners

Our Financials in 2023

Total income
USD117,668



Total expenses
USD80,387



Thank you
for your
support!
