Dear GiveInternet Community,

Thank you for standing with us in our mission!

As we continue reaching students in refugee camps and underserved areas, we see time and again that access to the internet is more than a connection – it is a lifeline to education and opportunity. For many of the students we support, it is often the only way to learn, build skills, and earn income. Where legal employment options are limited or unavailable, connectivity becomes a true game-changer. Thanks to your support, we connected 477 more minds to knowledge, education, and opportunity in 2024 reaching 3050 students in total!

We believe in a world where talent is not limited by geography or circumstance. Thank you for making it possible to create opportunities where they are needed most!

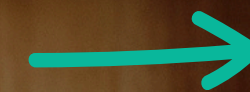

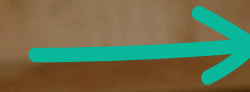

With gratitude,
Team GiveInternet.org

Our Impact in Numbers

This year

- **477** students brought online
- **538** new donors joined
- **2** new locations added

In total

- **3050** students supported
- **5671** donors
- **14** educational partners across **8** countries

The Problem

1.1 billion youth (aged 15–24) lack internet access. **67%** of whom are girls. Importantly, only **17%** of the world lives in an area without Internet coverage, making lack of affordability the main barrier to access.

The Solution

We find dedicated students in refugee camps, conflict affected and underserved areas, equip them with internet, laptops, skills training and help them find jobs and uplift their communities.

How we work

Educational Partners

We partner with two types of educational orgs: those, like **MIT Emerging Talent & Harvard Humanitarian Initiative**, that offer online educational programs for underserved and conflict affected students; and others, like **the University of Geneva**, that provide in-person training in refugee camps.

Student Selection & Connectivity

With our partners, we identify the most dedicated students entering or graduating from skills-development programs and support them with laptops and home internet access.

Lifelong Mentorship

Students join our online community for mentorship and support, where we host training and webinars and share education and job opportunities.

Sustainable Tech

We work with providers who refurbish high-quality second-hand laptops, reducing e-waste. This allows us to provide students with high-spec devices needed for technical subjects at an affordable cost.

Transparency

Donors receive monthly transparency reports with costs and achievement stories. We publish footage and stories from the field and advocate for connectivity.

Impact

We measure our impact with longitudinal qualitative studies.

Meet our Volunteer Ambassadors

Our Ambassadors are educators, writers, developers, scientists, academics, designers, and creators who, like us, believe in the power of the internet to transform the lives of underserved students.

Barbara Oakley
Professor of Engineering

"Giveinternet.org makes it remarkably easy for anyone to sponsor internet access, laptops and educational resources for underprivileged students.

A little help goes a long way, and with GiveInternet.org, even a small donation can make a real difference by providing young people with the tools they need to thrive."

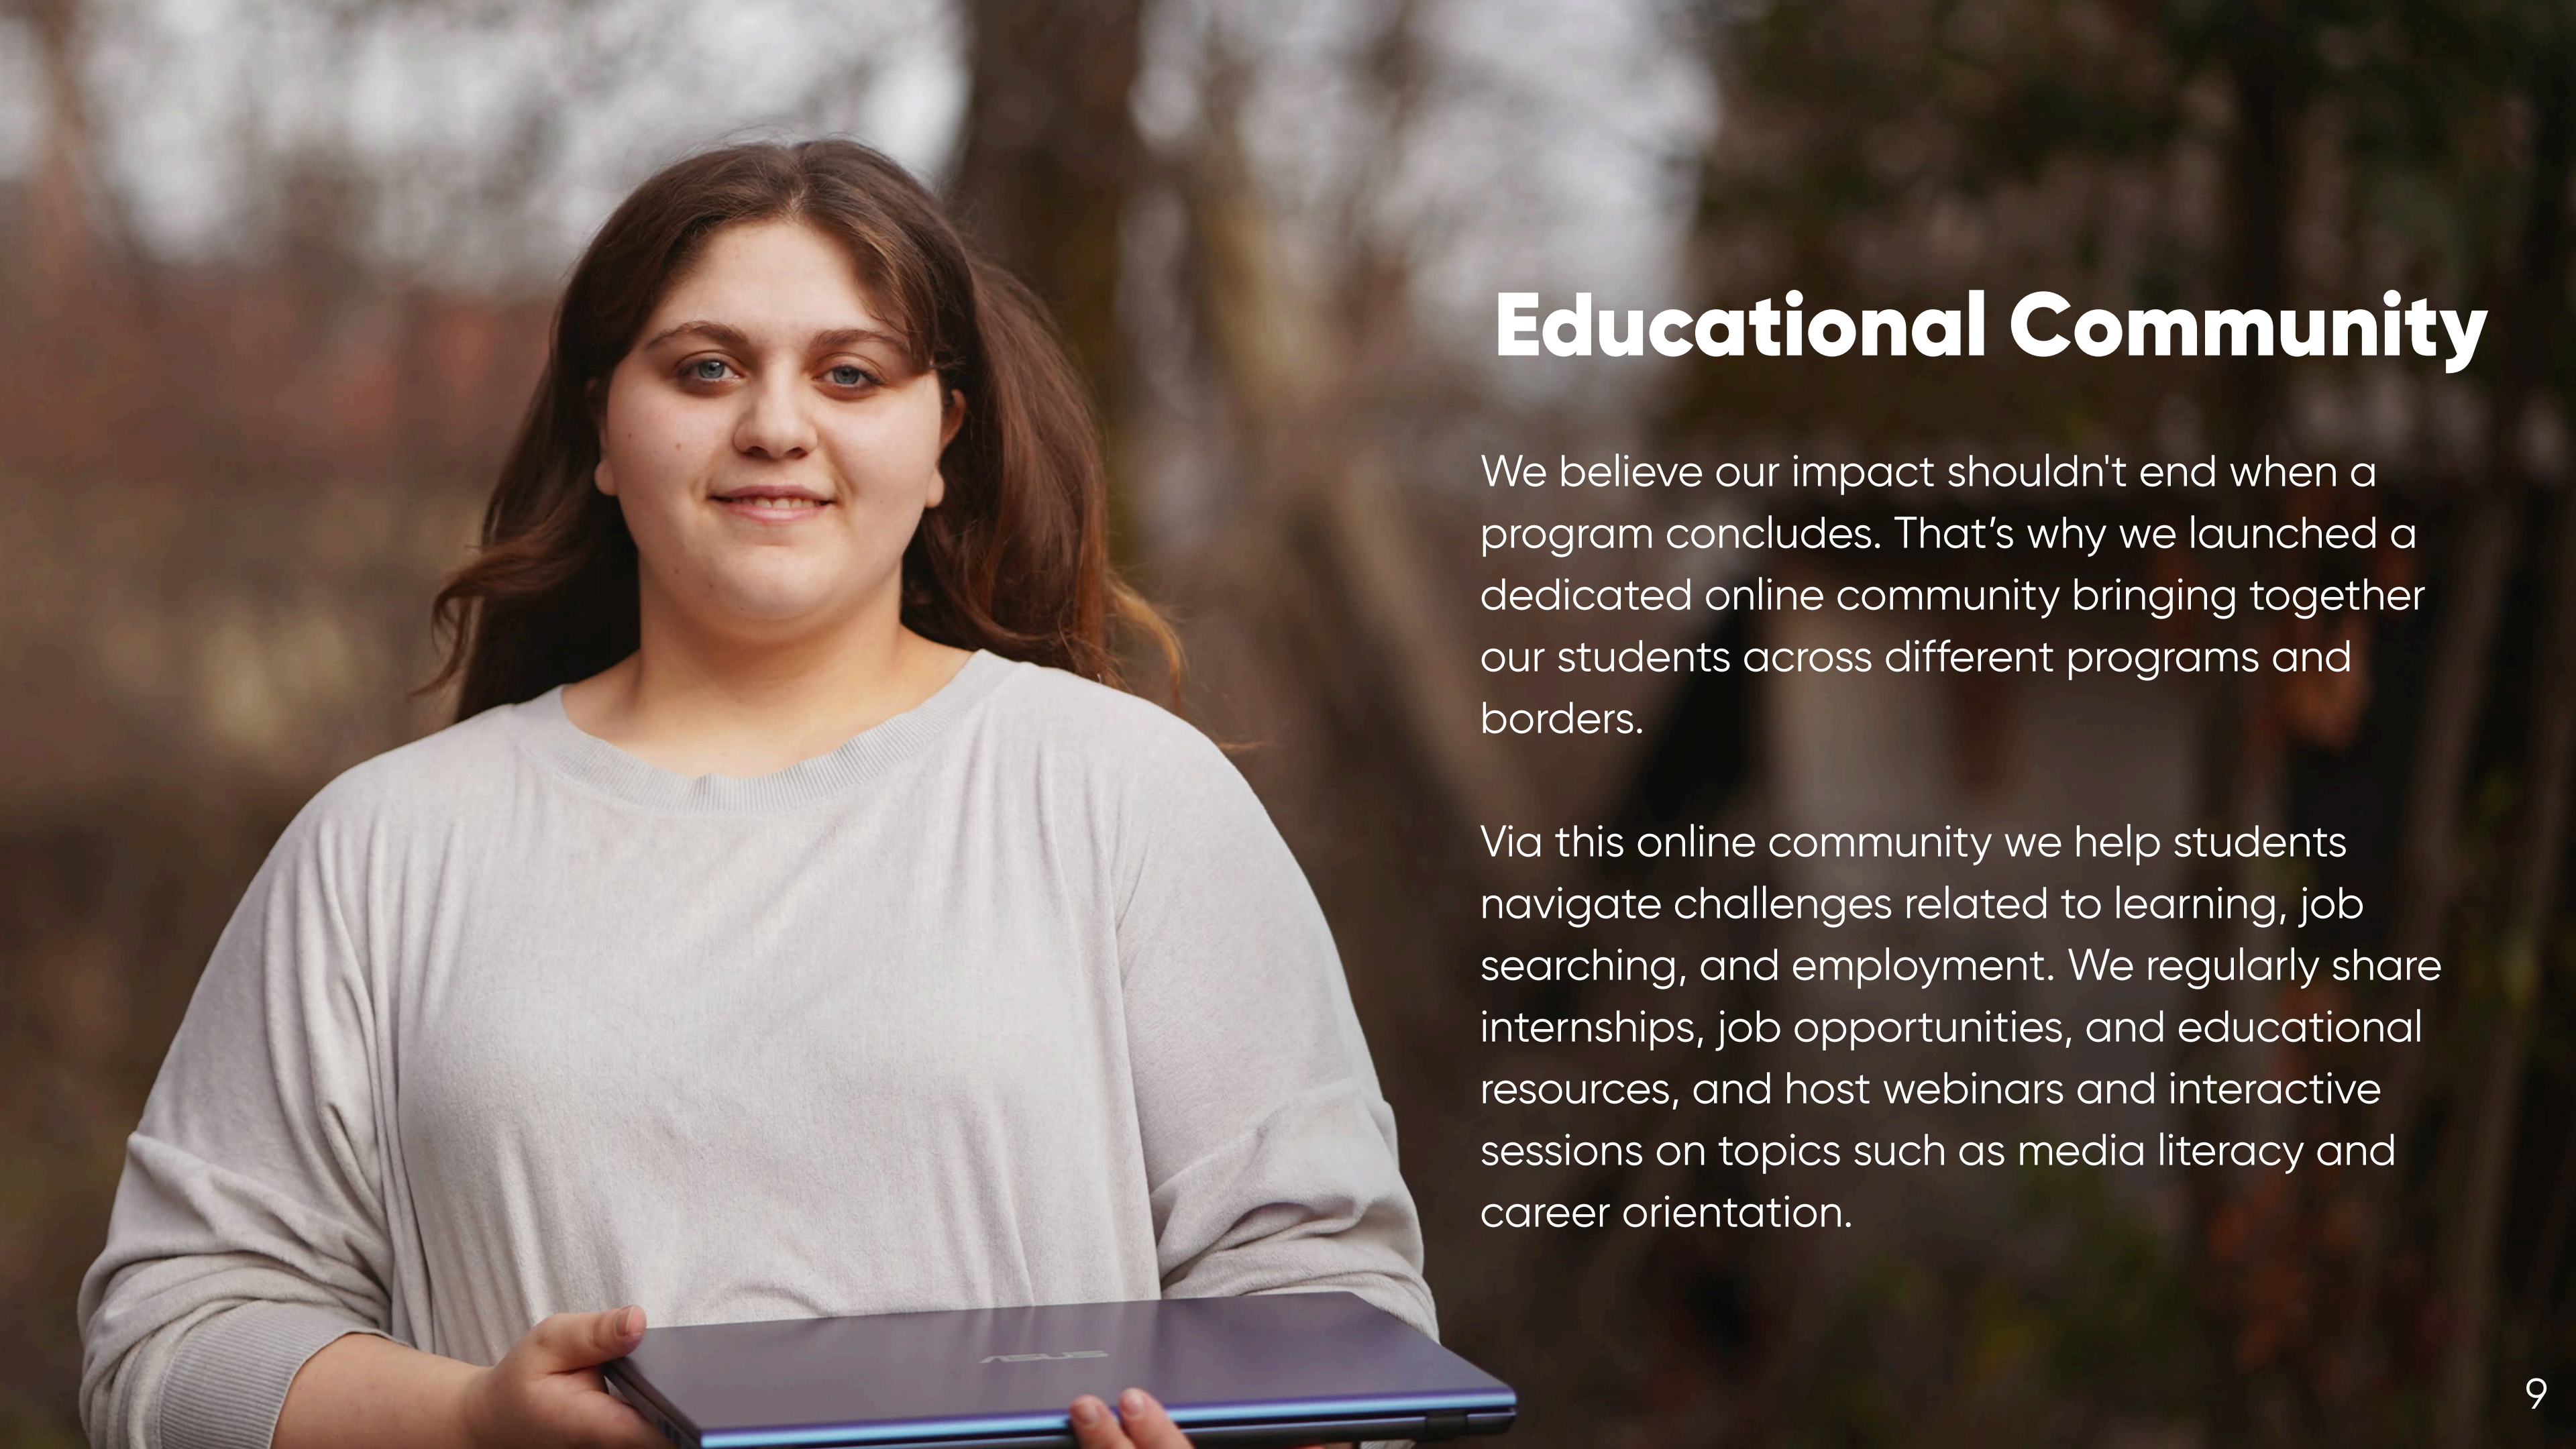

"Internet access is something many of us take for granted, but in many communities around the world it's not available, and for the people who live in these places, that significantly limits their opportunities for a better life.

GiveInternet is a platform that makes it simple and transparent for anyone to sponsor internet access, laptops, and education for students in under-resourced countries".

Jennifer Gonzalez
Education Writer
Cult of Pedagogy

Through social media shoutouts, fundraising livestreams, and video integrations, they advocate for our mission to provide internet access to students in need. Together, they help raise awareness about GiveInternet.org and the importance of closing the digital divide.

Educational Community

We believe our impact shouldn't end when a program concludes. That's why we launched a dedicated online community bringing together our students across different programs and borders.

Via this online community we help students navigate challenges related to learning, job searching, and employment. We regularly share internships, job opportunities, and educational resources, and host webinars and interactive sessions on topics such as media literacy and career orientation.

The Map

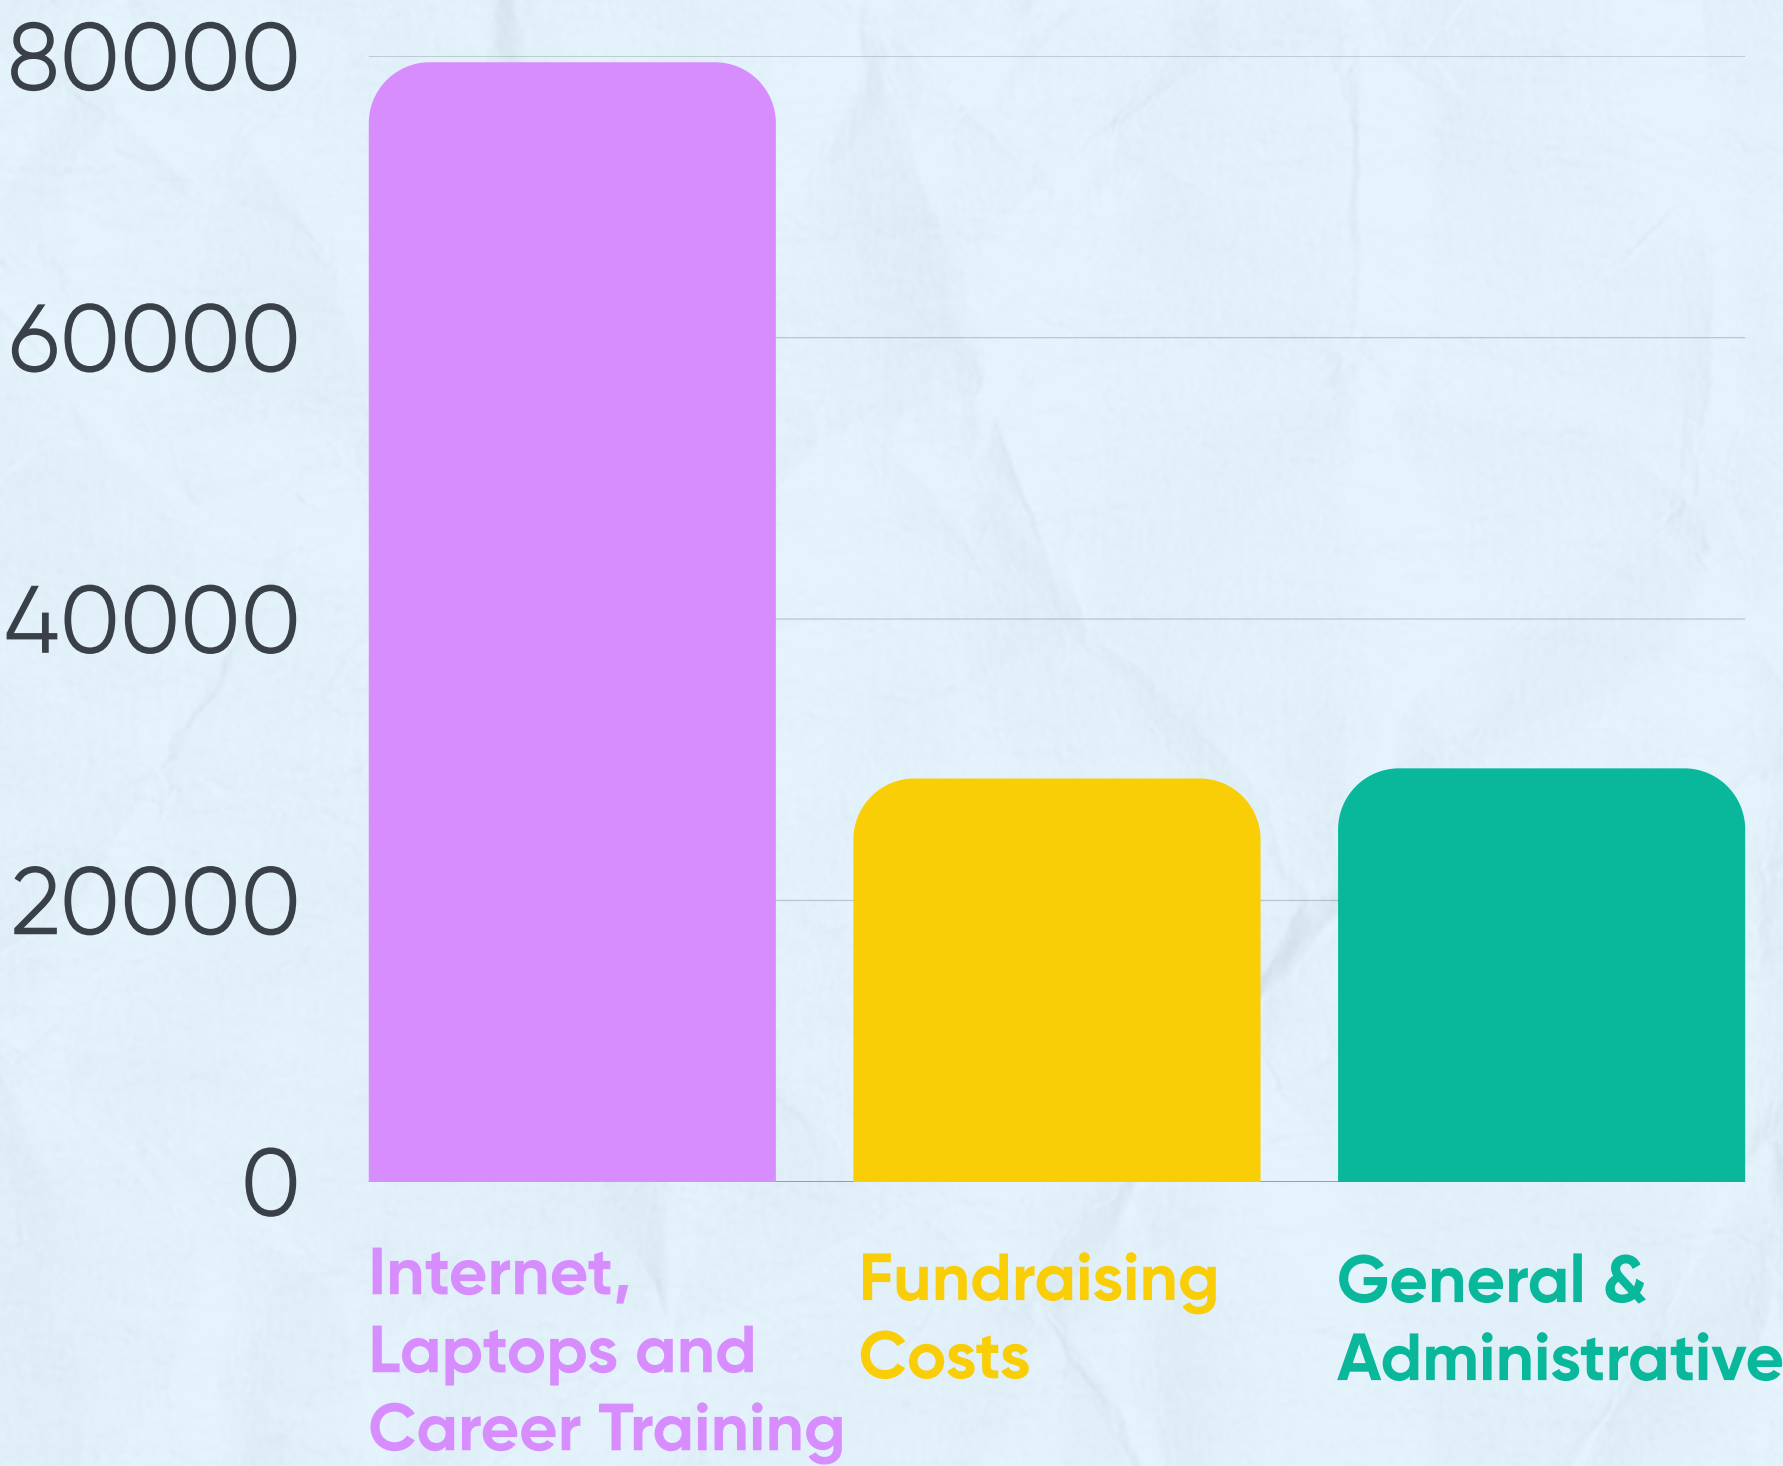

In 2024 we expanded to 2 new countries:
Lebanon & South Sudan
